Comprehensive Case Management

Designed specifically for probation, parole and other community corrections applications, COMPAS Case Manager is seamlessly integrated within the COMPAS Suite allowing for the tracking and management of all case processing events.

Person Summary Screen

The Person Summary Screen inventories the complete offender history including their COMPAS assessment and secondary assessment history, case plan, progress history and case management history. The case summary screen provides a similar overview “at-a-glance” summary of current case management activities and status.

Scheduling and Accounting

COMPAS Case Manager includes a complete scheduler allowing for the automatic posting of case plan tasks, next court dates and other events as they are entered in the system.

Case Supervision and Violations Tracking

COMPAS Case Manager tracks court sentencing information, conditions of probation or parole, supervision level start/stop dates and reasons, violation, warrant and sanction information. Major events can be configured in the software, auto-populating the case “Events Log” with a running history of major case processing activities.

Dashboards and Other Features

COMPAS Case Manager includes several other case tracking features including a user defined “Dashboard” which provides summaries of various case status and workload information each time you log in to your home page.

Reports and Statistics

The Northpointe Suite, including COMPAS Case Manager, includes a comprehensive easy to use ad-hoc report generator allowing for the custom creation of an unlimited number of roster reports and statistical tabulations. The ad-hoc report generator gives line staff, managers and administrators easy access to all of the data fields in the system across all licensed software titles in the suite. Report outputs can be for importing into spreadsheets and statistical packages for more advanced analysis.
