

# COMPAS | Case Manager

Northpointe's COMPAS Case Manager was developed from years of staff's experience in community corrections program design, implementation, management and evaluation. COMPAS Case Manager, including an optional drug court module, is a comprehensive, dynamic software solution managing all aspects of offender processing and case management. As with all titles in the COMPAS Software Suite - COMPAS Case Manager easily interfaces with other third party management information systems providing a seamless, easy to use system for all your case management needs and is completely scalable making it affordable and applicable for agencies with just a few staff to statewide corrections systems with thousands of users.

## Comprehensive Case Management:

Designed specifically for probation, parole and other community corrections applications, **COMPAS Case Manager** is seamlessly integrated within the COMPAS Suite allowing for the tracking and management of all case processing events.

## OFFENDER SUMMARY SCREEN

The Offender Summary Screen inventories the complete offender history including their COMPAS assessment and secondary assessment history, case plan, progress history and case management history. The case summary screen provides a similar overview "at a

## SCHEDULING AND ACCOUNTING

**COMPAS Case Manager** includes a complete scheduler allowing for the automatic posting of case plan tasks, next court dates and other events as they are entered in the system. Calendars are created for the client, case worker, work crew supervisor, and service provider. The Accounting module tracks all fines, costs, restitution, and fees including credits, debits, bank ledgers, check writing and more.

## CASE SUPERVISION AND VIOLATIONS TRACKING

**COMPAS Case Manager** tracks all court sentencing information, conditions of probation or parole, supervision level start/stop dates and reasons, violation, warrant and sanction information. Major events can be configured in the software, auto-populating the case "Events Log" with a running history of major case processing activities.

## DASHBOARDS AND OTHER FEATURES

**COMPAS Case Manager** includes several other case tracking features including a user defined "Dashboard" which provides summaries of various case status and workload information each time you log in to your home page. Medical and mental health inventories, complete arrest, arraignment, docket activity, conviction, disposition and sentence tracking information is provided. Treatment histories can be recorded, sex offender registration and gang membership documented and comprehensive case notes with various retrieval filters are provided. Document imaging and interfaces to biometric solutions are also provided.

**COMPAS Case Manager** provides for the linking of various family members and associates by type to a case with easy viewing of these associates, relationships and status. An automated pre-sentence investigation module auto-populated with COMPAS assessment data is customized for each agency.

## COMPAS SUITE AD-HOC REPORT GENERATOR

The COMPAS Software Suite, including **COMPAS Case Manager**, includes a comprehensive easy to use ad-hoc report generator allowing for the custom creation of an unlimited number of roster reports, statistical tabulations and trend charts. The ad-hoc report generator gives line staff, managers and administrators easy access to ALL of the data fields in the system across all licensed software titles in the suite. Report outputs can be exported in PDF, various spreadsheet formats including Excel, Word, XML, and RTF for importing into statistical packages for more advanced analysis.
